Vetروفen®

Helping them be happy and sound!™

100% Natural
NO BANNED SUBSTANCES

Vetrofen®

From the creators of Equine Oxyshot®, the No.1 Instant calmer, Animalife now bring you Vetrofen® and Vetrofen® pet, the No.1 Natural bute alternative for fast and effective joint and muscle support.

Since the launch of Vetrofen® Animalife has been receiving unprecedented levels of feedback from customers and their Vets. The reason... people's horses are now mobile, happy and comfortable. In many cases not just field sound, but out of retirement and enjoying being ridden again.

Never before have so many people testified to the fast and effective results of Vetrofen®. Vets are now seeing its effects after visiting client's horses routinely to find they are free moving and sound. In most cases Vetrofen® is used long term but it's also very good for short term management of bumps and bruising and great for support after heavy work.

Vetrofen® is a proprietary blend of botanical plant extracts with a strong antioxidant effect, to assist the body's inflammatory response naturally with great comforting assistance. It can help provide short-term relief from a strain or bruising, as well long term support for the stiffness and arthritis associated with old age. Vetrofen® is great for active pets and horses of all ages and especially useful in helping your older ones be mobile, happy and active for longer. Vetrofen® is 100% natural, safe for long term use with no side effects and contains no banned substances.

Vetrofen® Instant Impact 24 hour booster packs and 7 day courses are only for use with acute problems such as bumps and bruises. For horses who struggle with poor mobility or old age use 21/90/180 packs, using a loading serve of Vetrofen® to start. For an average weight horse, ideally use x2 sachets in the morning and x2 sachets in the evening until desired effect reached (normally 3 - 5 days or up to 10 days in severe conditions) then reduce serve to Maintenance PLUS (x2 sachet/day), then Maintenance (x1 sachet/day).

Nothing is more effective or fast acting, naturally and without side effects.

"Vetrofen eases any knocks, bangs or bruises they may have, it also helps my older horses to remain looser in their joints when used daily"

Matt Ryan OAM

- Triple Olympic Gold Medalist

"I use and recommend Vetrofen"

- Top British Showjumper

Vetrofen®

More information about Vetrofen®

Vetrofen® is a proprietary blend of natural herbal plant extracts from Scutellaria baicalensis and Acacia catechu. The plants have been used in foods and health products for thousands of years, especially in Japan and China.

The two key ingredients, in Vetrofen® have been studied extensively around the world and recognized for their anti-inflammatory and antioxidant properties, as well as their exceptional safety profile. The ingredients in general are the healthful ingredients that give color to vegetables, fruits, cocoa, red wine and green tea.

The herbal extracts of these ingredients found in Vetrofen® have been scientifically formulated to find key extracts of the plant flavonoids, baicalin and catechin. Flavonoids are compounds with anti-inflammatory and anti-oxidant properties, and these have been studied extensively and are recognised for their potency...great for mopping up any toxins that would build up in areas of swelling helping to get your horse sound and happy without discomfort fast!

Vetrofen® represents a whole new approach to managing Knocks, bumps and joint mobility / osteoarthritis by uniquely addressing the dietary imbalances of the metabolic processes involved, rather than merely focusing on the symptoms and masking the problem.

Vetrofen® is great for assisting superior mobility in joints, muscles, ligaments and tendons prone to problems or stiffness and greatly enhancing flexibility.

Vetrofen® promotes all-over wellbeing and a better quality of life for your horse like nothing else. Especially useful in helping older horses be sound, happy and active for longer.

Vetrofen® provides natural long lasting soothing without any side-effects for horses complaining from a long term issue or who are regularly unsound.

Now also available for your pet, Vetrofen pet®.

Unsound, poor mobility or old age case studies

"I wanted to find something natural that I could give her long term without side effects. Within a week she was extremely well, sound and very lively and she even wanted to trot when we were leading her out. I would highly recommend Vetrofen to anyone who has short or long term mobility or comfort issues with their horse or pony". - **Alison Friday**

"I could not believe how fast it worked! She is trotting out of her stable instead of being stiff and enjoying galloping round the field, which she never used to do. I can see such a difference it is quite unbelievable really and I know my horse is happy and comfortable which is fantastic. Her paces are free and she has her ears pricked forward when ridden now which I have not been able to do for ages as her arthritis has got more aggressive in the last few months. It is so nice to be able to ride my horse again and know she is enjoying it; it's the best thing ever! We even had a big gallop last week, which was fun for her and comfortable!" - **Mrs Armitage**

"He really is a different horse, I can even start cantering now and he was only ever meant to be field sound. It's like having a four year old back again!" - **Tracey Tuck**

"I have noticed a huge improvement. She is keen to come out her box and without a doubt is almost back to her jiggy joggy ways! We don't do much apart from hacking but she seems to be enjoying it more and she is much brighter in herself. The other day I had to push on to trot on the road due to the traffic, I have to say she was very keen and I did begin to wonder where the brakes were! And defiantly no sigh of lameness."

- **Gwyneth Maxwell**
