

## What is Volcanic Elements?

For millennia, nature has recycled life's most essential nutrients in a constant process of regeneration. Recent scientific research has revealed that humates resulting from natural decomposition contain all the essential nutrients necessary for proper metabolism. These "lifegiving" nutrients are now available in convenient liquid form. Volcanic Elements is specially formulated for the Animal Kingdom and is the world's premium animal mineral and vitamin supplement. It is the Total Nutritional Solution for animals and is manufactured exclusively for Medivet.

Volcanic Elements is formulated from naturally occurring fresh water humic shale mined from shale, rich in natural organic humates, located in New Mexico, U.S.A. This shale is the remains of an ancient fresh water sea that existed in the area during the time of the dinosaurs. Volcanic Elements minerals and vitamins are all natural and organic.

Contained in Volcanic Elements are all the necessary ingredients for life: phyto-chemicals resulting from plant photo-synthesis which are essential to proper health; amino acids used in DNA & RNA repair and synthesis; and a whole host of minerals and trace elements that result from the trapping and conversion of sunlight into the chemical energy so necessary to all life on earth.

## What does Volcanic Elements Achieve?

Volcanic Elements provide some of the most important building blocks of life. Owners of animals using Volcanic Elements have reported increases in energy, higher tolerance to stress, improved resistance to illness, increased performance levels and faster recovery from the aches and pains of life.

Recent laboratory research has demonstrated the fulvic acid contained in Volcanic Elements to be one of the most efficient cellular electrolytes known to mankind. Researchers believe that, in the presence of fulvic acid, cellular processes operate at peak efficiency. Humic and fulvic acids have been demonstrated to be highly efficient chelators of minerals and trace elements for transport through cell membranes, a process without which life on earth could not exist.

Laboratory testing suggests that humic compounds are also very effective at neutralizing toxic effects of heavy metals and other potentially harmful by-products, some of which are actually necessary, in trace quantities, for proper cell health.

## How does Volcanic Elements Work?

Volcanic Elements provide the best sources of organic, bio-available minerals, amino acids and trace elements available today. Volcanic Elements contain high levels of organic, bio-available humic and fulvic acid, the two essential compounds that result from nature's own process of recycling the elements of life. Volcanic Elements plays an important role in cell metabolism, acting as carrier of essential nutrients into, and metabolic wastes out of, the cell. It also converts some waste products into useful materials within the cell.

Volcanic Elements assists every stage of cellular metabolism and contains the most powerful, natural electrolytes known to man. It restores electrical balance to damaged cells and neutralizes toxins. When it encounters free radicals with unpaired positive or negative electrons, it supplies an equal and opposite charge to neutralize the free radical. It acts as a refiner and transporter of organic materials and cell nutrients. Volcanic Elements contains the most comprehensive range of bio-available microscopic nutrients available in an animal food supplement all totally absorbed into the body system.

## Can All Animals Benefit?

All animals can benefit from the use of Volcanic Elements. Whether an animal is large or small, a performance animal, a breeding animal or a loved and valued pet, Volcanic Elements will assist in many bodily functions, improving nutrient levels, nutrient absorption and elimination of waste.

## Benefits of Volcanic Elements

Volcanic Elements is the world's premium animal mineral and vitamin supplement and is made exclusively for Medivet. It is reported to show increases in energy, higher tolerance to stress, improved resistance to illness, increased performance levels and faster recovery from normal aches and pains. Volcanic Elements is also very effective at neutralizing toxic effects of heavy metals and other potentially harmful by-products, some of which are actually necessary, in trace quantities, for proper cell health. Volcanic Elements is a Premium 5 Star Quality product providing complex minerals and vitamins required by all animals for optimum health and wellness. Volcanic Elements provides the optimum health supplement for all animals.

## Side Effects?

Volcanic Elements is made from all natural ingredients. If used in accordance with the Directions, there are no side effects. It is completely Drug and Chemical free, 100% safe for all animals and does not swab.

## Is It Legal for Performance Animals?

Volcanic Elements is 100% clean, drug and chemical free. If used according to the Directions For Use, it will not compromise any performance animal in any event or race in which it competes. Being composed of the same materials as the animal's body, it does not swab.

## Sizes & Availability?

Volcanic Elements is available in 1 litre bottles. 10 litre drums are available on request.

## How is it Administered?

Volcanic Elements is very easy to use by almost anyone. Simply add it to the animal's food each morning. One teaspoon (5ml) a day is adequate for small animals (e.g. cats and small dogs), 2 teaspoons (10ml) for larger dogs and medium animals such as calves and foals, and up to 3 tablespoons (50ml) for larger animals such as cattle and horses.

## How Often is it to be Administered?

Once per day is sufficient. For large animals the dosage can be split into two, in two different feeds during the day. Volcanic Elements is very cost effective; 200 doses per bottle for small animals, 100 doses for medium animals and 20-40 doses for performance animals such as breeding cattle and horses, performance horses and general stock cattle, horse and camels. There is no wastage.

## Ingredients

Volcanic Elements contains 77 major and minor minerals including Vitamins A, B1, B2, B3, B6, B12, D2, E & K1 plus Amino Acids • Alanine, 5.8% Fulvic Acid, Glutamic Acid, Histidine, Isoleucine, Leucine, Methionine, Phenylalanine, Threonine, Tryptophan & Valine. All these are occurring naturally within the fulvic, humic and amino acids that make up the active ingredients. For a full list of minerals contained in Volcanic Elements please visit [www.medivet.net.au/volcanicelements.php](http://www.medivet.net.au/volcanicelements.php).
