

What is Pep 8 Plus?

Pep 8 Plus is an amazing new accelerated wound healing powder that contains selected peptides, proteins and growth factors present in the ovine placenta extracts of the StemVet science products together with the concentrated natural antibacterial properties of olive leaf extract.

Pep 8 Plus is the result of research by Medivet's own scientists to produce a unique formulation that combines the StemVet science unique growth factors and peptide proteins with olive leaf extract. It represents the healthiest, safest and most accelerated repair for cuts and lacerations on the market today.

The natural healing and antibacterial properties of olive leaf extract have been well researched and heavily documented for many centuries. This amazing substance is a member of the plant compound group Flavonoid from the plant *Olea Europaea*. The leaves contain the active compound Oleuropein that has long been known for its antimicrobial properties.

Olive leaf poultices have been used medicinally for centuries to aid skin infections. The olive leaf, a powerful antibacterial is acknowledged as being an effective antibiotic resistant against bacteria and fungi.

Pep 8 Plus, as a finished product, is a topical wound healing powder that contains all the healing and regenerative powers of the StemVet science products but is designed for external and surface wound repair and healing. It is applied directly to the affected area (open wound, skin infection etc) and should be covered with a light gauze or bandage to prevent the animal licking the site.

The 'Magic' Active Ingredients of Pep 8 Plus

The Cytokine growth factors in Pep 8 Plus include:

- ✓ Anti-inflammatory and the wound healing properties and regenerative effects properties of transforming growth factors (TGF),
- ✓ Fibroblast growth factor (FGF),
- ✓ Hepatocyte growth factor (HGF),
- ✓ Fibronectin like peptide,
- ✓ Keratinocyte growth factor (KGF),
- ✓ Epidermal growth factor (EGF),
- ✓ Growth hormone releasing factor,
- ✓ Stem cell factor and
- ✓ Parathyroid hormone-related hormone (PTHrP).

The Peptides

Peptides play a crucial role in fundamental physiological and biochemical functions of life. For decades now, peptide research is a continuously growing field of science. A Peptide is a molecule formed by joining two or more amino acids. When the number of amino acids is less than about 50 these molecules are named peptides while larger sequences are referred to as proteins. The amino acids are coupled by a peptide bond, in which the nitrogen atom of one amino acid binds to the carboxyl carbon atom of another. Peptides (proteins) are present in every living cell and possess a variety of biochemical activities. They appear as enzymes, hormones, antibiotics, receptors, etc.

Can All Animals Benefit?

All mammalian animals can benefit from the use of Pep 8 Plus. Whether an animal is large or small, a performance animal, a breeding animal or a loved and valued pet, Pep 8 Plus will assist in the repair of major or minor surface wounds and skin infections.

Benefits of Pep 8 Plus

The natural healing and antibacterial properties of olive leaf extract ensure the rapid destruction of bacteria and fungi at the wound site. The growth factors and peptide proteins quickly repair the damage at the cellular level ensuring rapid healing of the wound or infection and a quick return to health and work or training for performance animals.

Side Effects?

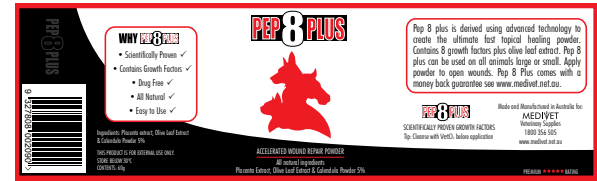

Pep 8 Plus, made from all natural ingredients, is completely Drug and Chemical free. If used in accordance with the Directions, there are no side effects.

Is It Legal for Performance Animals?

Pep 8 Plus, made from all natural ingredients, is completely Drug and Chemical free. If used in accordance with the Directions, there are no side effects.

Sizes & Availability?

Pep 8 Plus is available as a topical powder in 60gram bottles,

How does Pep 8 Plus Work?

The natural antibacterial properties of the olive leaf extract go to work immediately to kill any microbial or fungal infection at and within the wound. This is accompanied by the rapid action of the unique ovine placental extract containing growth factors and peptide proteins that repair the damage at the cellular level.

Damaged cells are rapidly repaired while those cells that cannot be repaired are replaced with new cells activated by the growth factors within the product. Scar residue is minimal due to the work of the peptides and multiple growth factors.

What does Pep 8 Plus Achieve?

Pep 8 Plus represents a significant enhancement over traditional remedies for your animal's cuts and lacerations as the all natural, drug free, no chemicals, 21st century technology healing solution. Cuts, lacerations and any open wounds or infections will respond rapidly to Pep 8 Plus, with rapid repair and restoration to full health.

How is it Administered?

Pep 8 Plus is applied by dusting the wound or affected skin area with the powder. A light covering such as gauze is recommended to deter the animal from licking the wound.

How Often is it to be Administered?

Each time you clean the wound and change the dressing you should reapply Pep 8 Plus to the affected area at least until a healthy scab has formed.
